

PART 6

**EXPEDITOR
SUPPLY LIST**

To be issued to all holders
of EO 05-45B-4 for inser-
tion at the back of that EO.

NOTE TO USERS

Part 6 of this EO has been prepared to the design and format of Section 26JU of CAP 10 and is being issued also as AL No. 8 to Section 26JU.

PREFACE

1. PURPOSE:

The purpose of the Supply List is:

- (a) To provide, as CAP 10 Section 26JU, a catalogue listing of airframe and ancillary spares authorized for the support of the Expeditor aircraft in its designated role.
- (b) To provide, as EO 05-45B-4, Part 6, an identical publication for specific use of personnel engaged in the maintenance support of this aircraft.
- (c) To provide, when used in conjunction with CAP 670 "Scale of Issue - Technical Shops", a means of determining unit entitlement of operational spares, tools, test, and ground handling equipment.

2. APPLICATION:

- (a) In its role as a catalogue section under CAP 10, Section 26JU, this Supply List consolidates in a single publication, all spares required for the maintenance of the Expeditor airframe and ancillary equipment. Therefore, non-airframe items are included in the Supply List although also appearing in their appropriate sections elsewhere in CAP 10.
- (b) As a supplement to EO 05-45B-4, (Part 6), the Supply List becomes an integrated, useful technical publication. It is so designed that the Section/Reference or RCAF Stock Number of any item can be obtained simply by cross-referring the item part number, obtained from normal EO sources, to the same alpha-numerically listed part number in the Supply List. Similarly, part numbers can be obtained from known Section/Reference or RCAF Stock Numbers by cross-referring to a separately listed Reference Number Index at the back of the Supply List.
- (c) This Supply List includes only those spares for which provisioning action has been taken or which have been designated as necessary supporting spares. Part numbers in EO 05-45B-4 that do not appear in this Supply List are not stocked for support of this aircraft.
- (d) Separately printed cover pages are employed to differentiate between the CAP 10 Section 26JU and EO 05-45B-4, Part 6 Supply Lists. In all other respects these Supply Lists are identical.
- (e) Amendments to the Supply Lists as issued will enable both CAP 10 and Engineering Orders to be up-dated simultaneously.

3. CONTENTS:

The Supply List employs column headings, abbreviations and notes as explained below.

4. COLUMN HEADINGS:

The following column headings are used:

- (a) Part Number - Manufacturers' part numbers or other Identification Numbers.
- (b) Manufacturers' Codes - Manufacturers' code numbers appearing in this Supply List are interpreted in Appendix "A" to this Preface.
- (c) CAP 10 Section/Reference or RCAF/Stock Numbers - Self-explanatory.
- (d) RNC - RCAF Reference Number Code as per CAP 16, Vol 1, Chapter 1.8.
- (e) Nomenclature - Only a brief description of items has been included. The detailed description of airframe spares is obtained from EO 05-45B-4 and in the relevant CAP 10 section for other items.
- (f) Class - RCAF Class of Stores as per CAP 16, Vol 1, Chapter 1.3.
- (g) UI - Unit of Issue as per CAP 16, Vol 1, Chapter 1.8.

PREFACE

4. COLUMN HEADINGS - cont.

- (h) Usage Code - Usage and scaling data has been included in this column. An explanation of the usage codes is provided in para 5.
- (j) Applicability Code - This column indicates the applicability of an item to the various marks or roles of the aircraft. An applicability coding chart is attached as Appendix "D" to this Preface.

5. DEFINITION OF USAGE CODES:

Insurance (INS) - The term "Insurance" is restricted to items of long procurement lead time or high value, purchased in restricted quantities against limited possibility of being required. Insurance items are not to be stocked at units. Demands for these items are to be supported by UCR's or explanatory letters.

As Required (AR) - The consumption of these items is erratic and difficult to predict. Units are to demand these items as needed until usage data is established.

Scaled Items - Scaling is divided into two categories as follows:

- (i) Scales prefixed by letters "FX" - These are firm scales of issue. Quantities in excess of those shown as entitlement in scaling chart, Appendix "B" to this Preface, are to be substantiated by submission of RCAF Forms E336 in accordance with CAP 16, Vol 1, Chapter 2.7.
- (ii) Scales prefixed by letter "S" - These scales are to be used by user units as a guide until sufficient data is accumulated to establish accurate usage data. Units are not restricted to quantities shown in scaling chart, Appendix "C" to this Preface. Demands may be submitted for requirements based on accumulated unit usage data.

Usage Rates - Items having a normal or high consumption rate are shown in this Supply List with a usage rate factor expressed by the number used per 1000 operating hours. Initial entitlement may be determined by multiplying the usage rate by the number of planned operating hours for a four month period and dividing the whole by 1000. Where there is a wide general application of spares such as accessories, hardware, tubes, resistors, etc., and it is not possible to provide usage rates identified with a particular aircraft or equipment, this column was left blank. Spares in this category will be demanded in accordance with unit usage rates.

Minimum (MIN) - The term "Minimum" applies to those items which have a low usage rate and which are not normally carried in stock at units. However, because of the vital operational role of the aircraft or equipment concerned, units are permitted to hold a designated number.

Local Manufacture (LM) - Items which are not procured and are to be manufactured by units from raw or bulk stocks.

6. ABBREVIATIONS:

| <u>ABBREVIATION</u> | <u>INTERPRETATION</u> |
|---------------------|-----------------------|
| AR | As Required |
| INS | Insurance |
| LM | Local Manufacture |
| W/EXH | When Exhausted Use |
| MIN | Minimum |

PREFACE

1. PURPOSE:

The purpose of the Supply List is:

- (a) To provide, as CAP 10 Section 26JU, a catalogue listing of airframe and ancillary spares authorized for the support of the Expeditor aircraft in its designated role.
- (b) To provide, as EO 05-45B-4, Part 6, an identical publication for specific use of personnel engaged in the maintenance support of this aircraft.
- (c) To provide, when used in conjunction with CAP 670 "Scale of Issue - Technical Shops", a means of determining unit entitlement of operational spares, tools, test, and ground handling equipment.

2. APPLICATION:

- (a) In its role as a catalogue section under CAP 10, Section 26JU, this Supply List consolidates in a single publication, all spares required for the maintenance of the Expeditor airframe and ancillary equipment. Therefore, non-airframe items are included in the Supply List although also appearing in their appropriate sections elsewhere in CAP 10.
- (b) As a supplement to EO 05-45B-4, (Part 6), the Supply List becomes an integrated, useful technical publication. It is so designed that the Section/Reference or RCAF Stock Number of any item can be obtained simply by cross-referring the item part number, obtained from normal EO sources, to the same alpha-numerically listed part number in the Supply List. Similarly, part numbers can be obtained from known Section/Reference or RCAF Stock Numbers by cross-referring to a separately listed Reference Number Index at the back of the Supply List.
- (c) This Supply List includes only those spares for which provisioning action has been taken or which have been designated as necessary supporting spares. Part numbers in EO 05-45B-4 that do not appear in this Supply List are not stocked for support of this aircraft.
- (d) Separately printed cover pages are employed to differentiate between the CAP 10 Section 26JU and EO 05-45B-4, Part 6 Supply Lists. In all other respects these Supply Lists are identical.
- (e) Amendments to the Supply Lists as issued will enable both CAP 10 and Engineering Orders to be up-dated simultaneously.

3. CONTENTS:

The Supply List employs column headings, abbreviations and notes as explained below.

4. COLUMN HEADINGS:

The following column headings are used:

- (a) Part Number - Manufacturers' part numbers or other Identification Numbers.
- (b) Manufacturers' Codes - Manufacturers' code numbers appearing in this Supply List are interpreted in Appendix "A" to this Preface.
- (c) CAP 10 Section/Reference or RCAF/Stock Numbers - Self-explanatory.
- (d) RNC - RCAF Reference Number Code as per CAP 16, Vol 1, Chapter 1.8.
- (e) Nomenclature - Only a brief description of items has been included. The detailed description of airframe spares is obtained from EO 05-45B-4 and in the relevant CAP 10 section for other items.
- (f) Class - RCAF Class of Stores as per CAP 16, Vol 1, Chapter 1.3.
- (g) UI - Unit of Issue as per CAP 16, Vol 1, Chapter 1.8.

PREFACE

4. COLUMN HEADINGS - cont.

- (h) Usage Code - Usage and scaling data has been included in this column. An explanation of the usage codes is provided in para 5.
- (j) Applicability Code - This column indicates the applicability of an item to the various marks or roles of the aircraft. An applicability coding chart is attached as Appendix "D" to this Preface.

5. DEFINITION OF USAGE CODES:

Insurance (INS) - The term "Insurance" is restricted to items of long procurement lead time or high value, purchased in restricted quantities against limited possibility of being required. Insurance items are not to be stocked at units. Demands for these items are to be supported by UCR's or explanatory letters.

As Required (AR) - The consumption of these items is erratic and difficult to predict. Units are to demand these items as needed until usage data is established.

Scaled Items - Scaling is divided into two categories as follows:

- (i) Scales prefixed by letters "FX" - These are firm scales of issue. Quantities in excess of those shown as entitlement in scaling chart, Appendix "B" to this Preface, are to be substantiated by submission of RCAF Forms E336 in accordance with CAP 16, Vol 1, Chapter 2.7.
- (ii) Scales prefixed by letter "S" - These scales are to be used by user units as a guide until sufficient data is accumulated to establish accurate usage data. Units are not restricted to quantities shown in scaling chart, Appendix "C" to this Preface. Demands may be submitted for requirements based on accumulated unit usage data.

Usage Rates - Items having a normal or high consumption rate are shown in this Supply List with a usage rate factor expressed by the number used per 1000 operating hours. Initial entitlement may be determined by multiplying the usage rate by the number of planned operating hours for a four month period and dividing the whole by 1000. Where there is a wide general application of spares such as accessories, hardware, tubes, resistors, etc., and it is not possible to provide usage rates identified with a particular aircraft or equipment, this column was left blank. Spares in this category will be demanded in accordance with unit usage rates.

Minimum (MIN) - The term "Minimum" applies to those items which have a low usage rate and which are not normally carried in stock at units. However, because of the vital operational role of the aircraft or equipment concerned, units are permitted to hold a designated number.

Local Manufacture (LM) - Items which are not procured and are to be manufactured by units from raw or bulk stocks.

PUBLICATIONS:

EO 05-45B-4 - Airframe
EO 10A-10AAA-4 - Engine
CAP 665 - Aircraft Equipment Schedule

Note: A separate Supply List covering the Wasp engine will be issued.

8. This Supply List replaces and supersedes CAP 665 - Aircraft Equipment Schedule where it applies to airframe and ancillary equipment.
9. The word "and" in the nomenclature column is represented by an oblique to suit electronic data processing requirements.

PREFACE
