**DESCRIPTION AND MAINTENANCE INSTRUCTIONS****MANIFOLD PRESSURE FITTINGS**

## INFORMATION

1 Some Expeditor aircraft have a restrictor fitting incorporated in the engine manifold pressure lines at the point where the lines are attached to the engines. This restrictor fitting is no longer a requirement as the engine manifold pressure indicators are fitted with a restrictor.

## INSTRUCTION

2 Where fitted the manifold pressure line restrictor fitting, at the engine, is to be removed at the next engine change.

ISSUED ON AUTHORITY OF THE CHIEF OF THE AIR STAFF
